United Packaging Inc.

United Packaging, Inc. (UPI) provides the best packaging solutions for its customers through design, testing, competitive pricing and service.

UNITED PACKAGING, INC.

About us

United Packaging, Inc (UPI) was incorporated in 1997 to provide a new better source for industrial packaging products. UPI provides its customers with top quality products, competitively priced and on time deliveries.

UPI specializes in the design, testing, high volume manufacturing and distribution of industrial packaging products serving the lawn and garden, appliance, window and door, recreational vehicle and OEM industries. We service our customers from large manufacturing plants located in Peterson, Minnesota, Windom, Minnesota, Reedsville, Wisconsin, Fond du Lac, Wisconsin and Tomah, Wisconsin.

UPI has a strong supplier network for hardwood and softwood lumber, fasteners, foam, corrugate, plastics and steel components. We maintain inventory of raw materials at all plant locations to provide rapid response to customer needs.

What we provide?

Design and Testing

One of UPI's greatest strengths is our ability to design and test the most cost effective packaging solutions for your products prior to production. UPI employs full-time Packaging/Design Engineers that work to ensure that your products arrive at the end user in the same condition as they were when taken off your production line. Our Engineers will generate design specifications for your packaging using Autocad CAD software.

In addition, UPI can work with you to develop specific testing procedures to duplicate "real world" shipping conditions. UPI will design a workable packaging solution to eliminate the problems.

Once the package is designed for your product, our design group will help you implement the use of the pack on your production lines. From setting up the line, to tooling and training, UPI will be there to assist you.

With help from Certified third party testing labs, UPI can perform test procedures to help gauge package structural integrity.

Products

At UPI we offer a wide variety of packaging solutions for any type of product in the industry. We can help you customize your package design and materials based on your specific products needs and unique characteristics. We also offer custom service such as: VMI, Consignment, JIT, repair, refurb, return and other custom programs to help meet your needs.
